

MARRIOTT CONFIDENTIAL AND PROPRIETARY INFORMATION

CODEFEST 4.0

“BRING YOUR OWN THEME - BYOT”

**GLOBAL TECHNOLOGY
INNOVATION SERIES**

INTRODUCTION

Welcome to Codefest 4.0 ! This document is a template to help create your submissions. Good luck and may the code be with you!

First and foremost, remember you are participating as a team. Please rename this document to your team's name and save it. This is the document you will be submitting.

Slide 4 is a placeholder for your **Project Title**. The Project Title represents your solution.

Slide 5 is a placeholder for **Team Introductions**. Please include the name of each team member along with a photograph. Further instructions are included on the slide.

Slide 6 is for your **Hypothesis**. Define the Product's Market Fit, qualifying whether it is a New Concept, New Opportunity, New Business Objective, New Industry Event (Regulatory or Standards) or an Existing Problem.

Slide 7 is for your **Solution Framework**. Describe how and where your solution would fit into Marriott's technology ecosystem.

Slide 8 is a placeholder for your **Working Prototype** with instructions on how to add it.

Slide 9 is a placeholder for your **Path to Production**. Describe the steps to take your idea to production.

EVALUATION CRITERIA

Your project will be evaluated in 2 rounds based on the following scoring structure:

Hypothesis:

- The Hypothesis establishes the market fit of your solution/product. Establishing its priority is an important aspect of how your team sees and seizes the opportunity in defining the scope of the Minimum/Maximum Viable Product.
- **Weightage:** 30%.
- **Min and Max Score :** 0 - 4.

Solution Framework / Modeling:

- The Solution Framework or the modeling should combine Design & Architecture. This helps justify the requirements, technology choices made and the way your team visualizes the integration of the solution with current/future systems.
- **Weightage:** 25%.
- **Min and Max Score :** 0 - 3.

Code Execution/Working POC:

- This demonstrates a working Proof of Concept (POC) of your solution.
- **Weightage:** 30%.
- **Min and Max Score :** 0 - 3.

Path to Production:

- Describe the steps to take your idea to production. Include total cost of ownership.
- **Weightage:** 15%.
- **Min and Max Score :** 0 - 3.

PRESENT YOUR HYPOTHESIS

You can edit this page, design and make it your own. Feel free to use Illustrations and Pictures. If you are referencing it to a document outside, please use a URL and ensure that you bundle all the documents into the assigned folder for you on the SharePoint Portal. Your hypothesis must address the following questions:

- What are you addressing through the theme you have selected?
 - A New Concept / Idea
 - A New Opportunity (Technology, Functional or Both).
 - A New Business Objective for Marriott that is an imperative.
 - An Event such as Regulation, Compliance, Standards or simply Competitive Pressure).
 - A Problem that exists to be addressed or one that you foresee.
- What business value will it deliver?
 - Quantify the expected business value delivered (Examples mentioned below)
 - Additional revenue
 - Operational efficiency
 - Cost savings
- Which Enterprise KPI(s) will this idea ladder up to? ***Intent to Recommend***

PRESENT YOUR SOLUTION ARCHITECTURE

This is a graphical representation of how your Solution Component would integrate with any upstream/downstream systems and/or channels in Marriott's technology ecosystem. Consider the following when building your diagram:

- Where does your Solution Component Fit?
 - Domain level (e.g., Commerce, Loyalty, Property Management, Revenue Management, Forecasting, Planning & Budgeting, Accounting & Financials, etc.)
 - Role Based Access Management
 - Intelligent Process Management (IPM)
 - Microservices
 - Data / Content Streaming
 - AX / CX / UI
- You can either illustrate it on this slide or provide a URL with a narration

PRESENT YOUR POC/PROTOTYPE

Include a link to a code compiled POC or Prototype along with a Demo Overview on this slide.

NOTE: While a live demo is preferred, you might like to have a recording of your demo available as a backup.

You will have **8 minutes** to complete your presentation end-to-end before the judges. This includes introductions, hypothesis, solution architecture, solution demo and path to production.

After your demo is complete, the judges may ask you some questions about your project.

PRESENT YOUR PATH TO PRODUCTION

- Project plan
 - Milestones
 - Resources
 - Duration
- One-time cost
- Ongoing cost
- Steps to implement

Total Lines of Code: xxxxx

List of technologies used:

- Technology 1
- Technology 2

MARRIOTT CONFIDENTIAL AND PROPRIETARY INFORMATION

MARRIOTT CONFIDENTIAL AND PROPRIETARY INFORMATION

**MARRIOTT CONFIDENTIAL AND PROPRIETARY INFORMATION.
DO NOT FORWARD. FOR USE BY IDENTIFIED RECIPIENTS ONLY.**

This document contains sensitive information about Marriott's business and is highly confidential and proprietary to Marriott International, Inc. The information in this document may not be shared or disclosed internally within Marriott or externally without express approval of Marriott's Chief Information and Digital Officer.

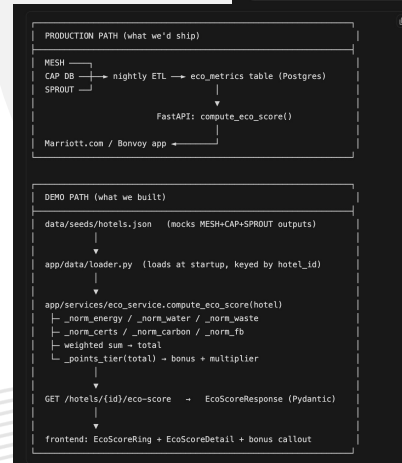

Dhruv Rough Slides

1. A slide explaining how the score works for a hotel
2. Surfacing per-property sustainability data at the moment of booking, paired with a Bonvoy Green Points multiplier, will increase **direct-channel intent-to-book** for eco-conscious travelers (~83% of modern travelers per the PRD). It is the first time a major hotel chain would expose this data per-property at the booking funnel.
3. We did end to end test of the app

"What business value will it deliver?" — Quantify

You're right that this isn't a direct cost-saving feature. The value is revenue uplift + brand differentiation, framed in three measurable buckets:

Lever	Quantification angle	Plausible target
Direct-channel share lift	Eco-leading inventory + bonus points = stickier direct booking; reduces OTA commission (15–25% of room rate)	+0.5pp direct share = ~\$12–25M/yr at Marriott's scale (back-of-envelope: ~\$5B in direct US bookings × 0.5%)
Conversion rate on eco-leader properties	A/B testable: show eco ring vs. hide. Measure <code>book / view</code> rate	Industry benchmark: trust badges/ratings on PDPs lift conversion 2–8%
Bonvoy enrollment & retention	Green Stay / Eco Warrior badges = engagement loop → repeat booking	Tracked via existing Bonvoy enrollment KPI
Serve360 storytelling	Hard, transparent number per property → marketing + ESG reporting asset	No competitor has it; defensible against greenwashing claims
Cost saving (indirect)	Score creates internal pressure on under-performing properties to fix energy/water/waste	Each 1% energy reduction across portfolio ≈ \$X (use Marriott's published utility spend)

To do

1. End to end test
2. Proper markdown
